

NYLEX SPECIALTY CHEMICALS SDN BHD

SPECIALITY PHOSPHATES (MALAYSIA) SDN BHD

Nylex Specialty Chemicals Sdn Bhd ("NSC") is the only licensed manufacturer of Orthophosphoric and Polyphosphoric Acids in Malaysia. The orthophosphoric acid is used in the degumming of palm oil during refining, in metal finishing, sugar refining, water treatment and as a catalyst carrier in polymerisation. Polyphosphoric acids (105% and 116% concentrations) are used in special applications such as catalyst carrier and dehydration agent. NSC also produces aluminium chemical polishing solutions under the brand name METABRITE and dipotassium phosphate solution which is used in the food and beverage industry such as in the production of coffee creamer.

The main product of **Speciality Phosphates (Malaysia) Sdn Bhd** is low ph sodium hexametaphosphate ("SHMP") which is used as a food and beverage additive or preservative. It also produces the normal neutral grade SHMP. SHMP is marketed under the trade name of PERPHOS.
